PROJECT TITLE	IOT based safety gadget for child Safety Monitoring andNotification

PROJECT DEVELOPMENT PHASE

SPRINT 2

Sprint 2 is about **LOGIN and NOTIFIACATION** of the IoT device in Parent's Web Application for getting information about Child's Status.

LOGIN:

This Coding is to built login page of parent's application to get information about child's condition.

Coding:

```
<!DOCTYPE html>

<html> <head>

<meta name="viewport" content="width=device-width, initial-scale=1">

<title> Login Page </title>

<style>
Body {
font-family: Calibri, Helvetica, sans-
serif;background-color: #9FE2BF;
}
```

```
button {  
  background-color: #9FE2BF;
```

```
width: 100%;  
color: black;  
padding: 15px;  
margin: 10px  
0px;border: none;  
cursor: pointer;  
}
```

```
form {  
    border: 3px solid #f1f1f1;  
}
```

```
input[type=text], input[type=password]  
{ width: 100%;  
margin: 8px 0;  
padding: 12px 20px;  
display: inline-  
block;border: 2px  
white;  
box-sizing: border-box;  
}
```

```
button:hover {  
    opacity: 0.7;  
}
```

```
.cancelbtn {
```

```
        width: auto;
        padding: 10px 18px;
        margin: 10px 5px;
    }

    .container {
        padding: 25px;
        background-color: #CCCCFF;
    }
</style> </head>

<body>

    <center> <h1> Login Form </h1> </center>

    <form>

        <div class="container">

            <label>Device ID/Number: </label>

                <input type="password" placeholder="Enter Password" name="password" required>

            <label>E-Mail : </label>

                <input type="text" placeholder="Enter Username" name="username" required>

            <label>Password : </label>

                <input type="password" placeholder="Enter Password" name="password" required>

            <button type="submit">Login</button>

            <button class="loginBtn loginBtn--facebook">Login with Facebook.</button>

            <button class="loginBtn loginBtn--google">Login with Google.</button>
```

```
<input type="checkbox" checked="checked"> Remember me
```

```
<button type="button" class="cancelbtn">
```

```
Cancel</button>Forgot <a href="#"> password? </a>
```

```
</div>
```

```
</form>
```

```
</body>
```

```
</html>
```

NOTIFICATION:

This coding will make connection between IoT Device & Parent's application. When the child cross across the geofence message will be notified on parent's application.

Coding:

```

```
}
```

Output:

The screenshot displays an IoT simulation environment. On the left, a 'Manager' tab shows MQTT logs. The main area features a 'Simulation' tab with a visual representation of an ESP32 microcontroller connected to a sensor module via jumper wires. The ESP32 is labeled 'ESP32'. The sensor module has a display and two circular sensors. A red wire connects the sensor's VCC pin to the ESP32's VCC pin, a green wire connects GND to GND, and a black wire connects the sensor's I2C pin to the ESP32's I2C pin. The top right of the simulation area shows a timer at 00:28.753 and a battery level at 96%. The bottom right has a status bar with a signal strength icon, a pause button, and a close button.
